

Vikas Soni

Shopify App Developer | PHP | Symfony | Shopify | SaaS E-commerce

vikassoni2018@gmail.com | +91 9996333824 | India

PROFESSIONAL SUMMARY

Dynamic and results-driven Full Stack Developer with 4+ years of experience specializing in Shopify SaaS applications and eCommerce solutions. Proven expertise in Shopify app development, subscription systems, payment gateway integrations, custom checkout solutions, REST and GraphQL APIs, scalable backend architectures, and secure transaction flows.

- Strong hands-on experience across Shopify SaaS apps, payment integrations, booking systems, custom storefront experiences, and backend services.
- Comfortable owning features end to end: requirement analysis, database/API design, admin and customer UI, webhook handling, testing, and maintenance.
- Experienced in guiding junior developers through implementation, reviews, task breakdowns, and knowledge transfer.

TECHNICAL SKILLS

Backend

PHP, Symfony, Laravel, Node.js, REST APIs, GraphQL, MySQL, Redis, RabbitMQ

Payments

Stripe, PayPal, Razorpay, refunds, wallet payments, card payments, transaction status handling

Tools

Git, GitHub, Postman, API documentation, Agile workflows, code review, team mentoring

Shopify

Shopify app development, Shopify APIs, Liquid, themes, app blocks, webhooks, storefront widgets

Frontend

React, Next.js, Inertia, JavaScript, Ajax, Tailwind CSS, Less CSS, responsive UI

PROFESSIONAL EXPERIENCE

Sr. PHP Developer

Stellen Infotech | Mar 2026 - Present

Developing and maintaining Shopify apps using PHP, Shopify APIs, and scalable backend services for SaaS and eCommerce workflows. Building Shopify themes and Liquid customizations, including storefront sections, theme settings, UI refinements, and performance-focused updates. Managing interns by assigning tasks, reviewing work, guiding implementation, and helping them follow development best practices.

- Deliver Shopify and Laravel workflows with admin/customer/vendor panels, email templates, payment settings, and polished UI behavior.
- Review intern work, clarify implementation details, and help maintain consistent coding practices.

Full Stack Developer | Software Engineer

Webkul | Feb 2023 - Feb 2026

Worked in PHP, Symfony, and Shopify with hands-on team leadership responsibilities. Managed project execution, assigned tasks to junior developers, conducted knowledge transfer sessions, reviewed code, analyzed requirements, mentored team members, and coordinated with stakeholders. Developed Shopify subscription applications, payment integration services, and Shopify AMP solutions using secure APIs, webhooks, scalable backend services, and performance-focused storefront templates.

- Built production Shopify app features around subscriptions, payment integrations, AMP storefronts, APIs, and merchant/customer workflows.
- Coordinated with stakeholders, analyzed requirements, mentored team members, reviewed code, and supported feature delivery.

Tester

Quantum IT Innovation | Jun 2022 - Dec 2022

Tested web applications and Android applications. Performed unit testing, functional testing, and non-functional testing. Created requirement documents according to client needs.

- Prepared requirement documents, tested web/mobile features, and reported issues clearly.

SELECTED PROJECTS

Product Subscription App

Full Stack Developer | <https://apps.shopify.com/webkul-subscription-app>

Tech: Shopify APIs, PHP, Symfony, REST APIs, webhooks, recurring billing, wallet/card payments

Shopify subscription application enabling recurring billing, flexible delivery cycles, wallet and card payments, and customer/admin controls for pause, skip, cancel, and renew actions.

- Built recurring order workflows for flexible delivery cycles, pause, skip, cancel, renew, and customer self-service actions.
- Implemented payment and webhook flows to synchronize billing, order, admin, and customer subscription states.
- Improved merchant controls for subscription plans, customer subscriptions, transaction status, and support operations.

Payment Service API

Backend/API Developer | <https://vikas-soni-sh1.vachak.com/payment-service/public/api/doc>

Tech: PHP, Symfony, Stripe, PayPal, Razorpay, REST APIs, webhooks, refunds, API documentation

Unified payment integration platform with PayPal, Stripe, Razorpay, webhooks, refunds, transaction status handling, and reusable APIs for external applications.

- Developed reusable payment APIs for payment creation, transaction status checks, refunds, and webhook processing.
- Created integration-ready API documentation and endpoint structures for external application usage.
- Mapped gateway responses into reliable internal transaction states with secure request handling.

Fizazzle Booking Platform

Full Stack Developer | <https://fizazzle.sistagging.com/>

Tech: Laravel, Inertia, React, Stripe, booking workflows, vendor assignment, invoices, email templates

Booking-focused service platform with customer scheduling, admin booking management, vendor assignment workflows, invoice handling, payment status tracking, and customer/vendor communication flows.

- Built booking flows across customer, admin, and vendor panels for service selection, assignment, and status management.
- Worked on invoices, PDF output, Stripe settings, payment status handling, and customer/vendor/admin email templates.
- Implemented vendor booking and earnings workflows while keeping customer-facing booking views simple and focused.

User Central

Full Stack Developer | <https://usercentral.webkul.com/>

Tech: PHP, Symfony, account management, authentication, service workflows, admin/customer modules

Webkul user management portal for centralized account access and customer-facing service workflows.

- Contributed to centralized account and customer service workflows for a user management portal.
- Worked on backend logic, interface refinements, account flows, and customer-facing service handling.
- Supported maintainable module structure for reliable access and service operations.

ReviewHub

Shopify App Developer | <https://apps.shopify.com/reviewhub-2>

Tech: Shopify, PHP/Symfony, webhooks, product reviews, Liquid widgets, storefront scripts

Shopify customer review management app by Stellan Infotech for collecting, managing, and displaying product reviews, star ratings, testimonials, and review widgets on storefronts.

- Developed product review, star rating, testimonial, moderation, and storefront widget features.
- Worked on storefront templates, average rating widgets, review forms, and review administration flows.
- Integrated Shopify order webhook-based review request flows and customer/product review data handling.

Shopify AMP App

Shopify Developer | <https://apps.shopify.com/amp-by-webkul>

Tech: Shopify, AMP templates, Liquid, performance optimization, SEO, responsive storefront UI

Shopify AMP solution for fast-loading, mobile-optimized storefront templates with responsive AMP-compatible layouts, SEO compliance, and improved page speed.

- Built AMP-compatible storefront templates for faster mobile pages and SEO readiness.
- Worked on merchant configuration, responsive rendering, storefront compatibility, and speed improvements.
- Optimized UI structure and assets for fast-loading mobile commerce experiences.

EDUCATION

MCA (Master of Application)

Completed MCA with CGPA 8.6.

SGT University, Gurugram | 2021 - 2023

B.Com

Completed B.Com with 71%.

KUK University | 2018 - 2021
