| - JavaScript | - Less CSS |
| - RESTful APIs and GraphQL APIs Integration | - UI/UX Optimization and Component Development |
| - Performance Tuning and Code Optimization | - Postman, Redis, RabbitMQ, SQL |
| - Git, GitHub and Agile Workflow | |

Professional Experience

Stellen Infotech

Sr. PHP Developer | Mar 2026 - Present

- Developing and maintaining Shopify apps using PHP, Shopify APIs, and scalable backend services for SaaS and eCommerce workflows.
- Building Shopify themes and Liquid customizations, including storefront sections, theme settings, UI refinements, and performance-focused updates.
- Managing interns' responsibilities by assigning tasks, reviewing work, guiding implementation, and helping them follow development best practices.

Webkul

Full Stack Developer | Software Engineer | Feb 2023 - Feb 2026

- Worked as a Software Engineer in PHP, Symfony, and Shopify with hands-on team leadership responsibilities. Managed project execution, assigned tasks to junior developers, conducted knowledge transfer sessions, reviewed code, analyzed requirements, mentored team members, and coordinated with stakeholders to maintain quality, scalability, and development best practices.
- Developed and maintained a Shopify Product Subscription Application enabling recurring billing, flexible delivery cycles, wallet and card payments, and subscription management. Implemented customer and admin controls for pause, skip, cancel, and renew actions, with Shopify APIs, secure payment flows, and scalable backend services for high-volume subscription operations.
- Designed and implemented a unified payment integration platform supporting PayPal, Stripe, Razorpay, webhooks, refunds, transaction status handling, and reusable APIs for external applications across multiple eCommerce platforms.
- Developed Shopify AMP solutions for fast-loading, mobile-optimized storefront templates with responsive AMP-compatible layouts, SEO compliance, improved page speed, and integration with existing Shopify themes and apps.
